- Optional Support for Hand Biometric Readers
- Optional Job Costing/Validation (including quantities and piece rates)
- Optional Access Control And Schedule Lockout
- Optional Occurrence Ratings Module
- Optional Telephony Module
- Available with an integrated database (GENESIS PRO) or utilize your existing SQL database (GENESIS SQL).

## Remember, employee payroll is YOUR BIGGEST EXPENSE...

GENESIS is a "full-featured" comprehensive management tool that will help you gain greater control over productivity and provide the accuracy needed in your business operations. It is an easy-to-use, powerful time and attendance solution that allows you to automate your company's timekeeping, attendance tracking, job costing, benefit administration, labor scheduling, data collection and access control. GENESIS eliminates paper timesheets, which are the root of most payroll nightmares! Employees enter data at an electronic data terminal using magnetic stripe, bar code or biometric technology. Optional PC entry is available along with timesheet submittals for exempt employees. The GENESIS software collects these transactions and your pay rules are applied automatically, consistently and impartially.

The GENESIS's powerful reporting system produces valuable management reports, which help control overpayment of employees and ensure proper distribution of labor costs. GENESIS's reports also help you avoid unauthorized overtime, track employee status, track benefit administration, control departmental costs, monitor staffing, perform job costing, and much more. Optional modules such as Job Costing & Validation, WebClock, Telepunch, Access Control & Profile Lockout, Benefit Accruals, Occurrence Ratings, PDA Clock and Bell Control are available and integrate directly into the system.

The automated time clock polling and report generation capability standard with GENESIS allows you to define a processing schedule. GENESIS will poll the time clocks, process reports and even email them to supervisors automatically without operator intervention. The optional Benefit Accrual Module allows you to define benefit accrual calculations that automatically update your employee's accrual balances.

Know exactly where your employee's time and dollars are spent. Implement your rounding rules, not your employee's. Eliminate Payday Panic. GENESIS is a "full-featured" comprehensive management tool that will help you gain greater control over productivity and provide the accuracy needed in your business operations.

**Automate the calculation of employee's time.  
Apply complex pay policies.**

## Put a stop to unauthorized overtime and costly payroll errors.

- Give your managers the tools they need to make better decisions and control labor costs.
- Reduce the risk of costly payroll errors and inflated labor costs.
- Eliminate paper timesheets and other error-prone manual and homegrown processes.
- Deliver pay accurately and on time with consistent pay practices.
- Improve overtime management and apply pay and work policies consistently and accurately across your organization.

Know exactly where your employee's time and your dollars are spent. Implement your time rounding rules, not your employee's. Because of the SIGNIFICANT cost savings experienced by our customers, Central Time Clock systems can easily pay for themselves in less than one year.

Improve workforce productivity while reducing your total payroll costs

# Reports that help you gain better control over Your Business:

## Labor utilization and Costs:

Efficiently maintain productivity and performance while meeting your business goals by making sure the right people are scheduled to work at the right time. Better manage your labor to budget with automation tools such as actual vs. budgeted and coverage reports. Identify personnel to fill open shifts without having to pay overtime.

## Risk of noncompliance:

Manage FMLA and overlapping state leave laws more easily and track intermittent leaves. Reduce labor-related costs and liabilities by automatically and consistently applying company policies, union rules, and government mandates across your organization.

## Employee Attendance Infractions:

Gain unprecedented visibility into employee absenteeism, trends and patterns. Enforce attendance and leave policies consistently in order to reduce payroll inflation and control unauthorized employee absences.

Labor Management - The Heart of Your Business

Automated • Accurate • Timely

# Flexible Modules

## Benefit Accruals & Administration:

- Automatically calculate the balances of each employee's available benefit time, such as vacation, personal and sick time.
- Automatically update employees accrual balances
- Monitor an employee's use of leave balances.
- Maintain an Audit Log of posted accruals and debits.
- Helps ensure compliance with FMLA regulations.
- Accommodate a wide variety of methods for accruing leave time, as well as the many complex rules found in organizations today.
- Keeps leave balances current, and automatically change employees' rate of accrual on a specified day based on seniority and entitlement.
- Restrict the number of leave hours that may be carried over from one year to the next.
- Schedule future leave requests and have the system track them in a pending category.

Eliminate error prone, time consuming, manual accrual calculations.

## Job/ Labor Costing & Validation

- Empowers your managers with the insight into actual labor performance, allowing them to make valuable management decisions.
- Align workforce performance with corporate revenue, cost, and profitability objectives.
- Improve workforce productivity while reducing your total payroll costs.
- Over 100 User definable reports.
- Employees Can Collect Data from Any Remote Location using multiple data collection methods.
- Completely integrated with Time & Attendance Compares Actual wages paid with input Budgetary, Scheduled and Charge rate factors.

Empower your managers with the insight into actual labor performance

## Occurrence Ratings

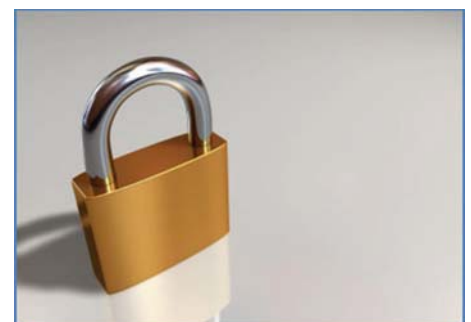

- Automatically generates points for infractions.
- Automatically charges benefit time for attendance infractions.
- Automatically generates notices when points levels are reached
- Easily identify employee attendance trends.
- Apply your attendance policies consistently throughout your organization.
- View, add or edit point balances and notifications

Employee Points Tracking System  
Automated • Simple • Fair

## Access Control & Profile Lockout

- Lock out or warn employees who try to clock in or out when they are not scheduled.
- Limit employee access to all areas of your operation or to specific areas only.
- Lock out unauthorized personnel. Lock out tardiness and early bird
- Have your employees punch IN/OUT when and where they are supposed to according to company policies, not their own.
- Force late arrivals and early departures to notify the supervisor in order to punch.
- Control punching by employee, time of day, and day of week.
- Greet your employees with a friendly message.
- Automate the Guard tour log process. Guards can log at data collection points or carry a portable device and log at tour check points. Guards can also log incidents through the Access system.

Eliminate unauthorized overtime.  
Limit designated areas to authorized
